

The systems of

SCHOBER medicare GmbH

consist of an easy-to-use control device and a so-called applicator, which generates the pulsed magnetic field. The field flows through the entire body (whole body application) or parts of it (local application).

Applicators

- ▲ Mat applicator (mat)
- ▲ Blanket applicator (blanket)
- ▲ Pillow applicator (pillow)
- ▲ Rod applicator (rod)
- ▲ Surface applicator (box)
- ▲ Tinnitus applicator (headphones)
- ▲ Cuff applicator

Raised consciousness and a responsible attitude towards our bodies

with regular
pulsed
magnetic field therapy

ENZYMED MMFSG-5000

The comfortable device with pre-set therapeutic programs and many individual adjustments.

This device is certified in accordance with Appendix II, Section 3 of Directive 93/42 EEC and bears the CE symbol 0124.

Therapy with electromagnetic fields

... in many diseases
an alternative
for more quality of life

Long before there was life on this planet, energy fields penetrated the cosmosan - important factor in evolution. The same energy fields in humans and animals play an important role in growth, regeneration and healing, sleep, a balanced health status and inner harmony.

Dissatisfied with your health?

Want to do something to improve how you feel?

In the comfort of your home.

Our solution for you:

Pulsed magnetic field resonance therapy!

Electromagnetic vibrations give the various phenomena in nature their structure and form them into a functional whole.

Electromagnetic vibrations show us that this whole is more than the sum of its parts. If the energy flow in the body is diminished or disturbed, the optimal harmony of the parts fails, the target functions are deviated from and an illness develops.

Solar radiation, cosmic radiation and the earth's magnetic field are the basis of the existence of all higher forms of life. Within the organism as well, most information and control processes are based on electromagnetism, for instance neural signals, ion exchange, protein synthesis, enzymatic and hormonal functions. These mechanisms are inhibited by influences of modern civilization such as

- ▼ Stress
 - ▼ Unhealthy diet
 - ▼ Environmental toxins
 - ▼ Electrosmog
 - ▼ Lack of movement
 - ▼ Insufficient amounts of time spent in nature
- This all encourages the development of illness.**

This is where energy-based medicine with its therapeutic benefits comes in.

The home and practice therapeutic devices from SCHOBER meditec GmbH were developed on the basis of modern electronics and are used in both prevention and treatment of illnesses in humans and animals.

The devices generate pulsed magnetic fields that can neither be seen nor felt.

The fields penetrate deep into the body to individual cells, bones, vessels and inner organs, i.e. all tissues are reached.

The objective is

- ▲ to supply badly needed energy
- ▲ to active powers of self-healing
- ▲ to reinstate physiological regulative processes.

Modern medicine is also aware that stimulation of the body's defence mechanisms is often the most successful approach. The natural, physiological healing powers of the body itself the "inner doctor" often require only a little support to be reactivated.

Contraindications

No side effects are known. As in many other therapies, an initial exacerbation of symptoms is typical.

Do not use in the following cases:

- ▼ Implanted electrical devices (e.g. cardiac pacemaker)
- ▼ During pregnancy or breast-feeding
- ▼ Acute conditions involving high fever
- ▼ Convulsive conditions not compensated by medication (e.g. epilepsy)
- ▼ Severe cardiac dysrhythmias

This bioelectrical stimulation results

- ▲ in an overall improvement in cell nutrition
- ▲ in improved circulation
- ▲ in a positive influence on the acid-base balance
- ▲ in increased tissue oxygen enrichment
- ▲ in increased enzymatic activity
- ▲ in a strengthening and harmonization of the immune defence systems
- ▲ in a reduction of pain

These properties mean the method

can be used in the following indications:

- ▼ Bone and joint disease
- ▼ Back problems
- ▼ Neurological and psychosomatic conditions
- ▼ Arterial and venous circulatory disturbances
- ▼ Respiratory tract diseases
- ▼ Metabolic disturbances

Making use of magnetic field therapy at home is an excellent way to do something for one's own quality of life.
