PEMF REPAIR...Rebuild...The power to heal!

Scientific Studies

PEMF (Pulse Electromagnetic Field) Therapy is a 3D pulse therapy that re-energizes damaged cells by inducing electrochemical changes within the cell that restores it to its normal healthy state. The electrochemical changes that it induces increases cellular metabolism. By increasing cellular metabolism of all the cells that are affected by the pulse, cell proliferation is boosted especially blood cells. The increased blood circulation that occurs will boost the effectiveness of the oxygen capacity of the blood and the repair of many pain filled areas. Systems such as the immune system, the nervous system, the digestive system and the lymphatic system all see significant improvements in their functions. Joints and bones are strengthened and stiffness in those areas are reduced. PEMF stimulates the body to being removing toxins from the body continuing the improvement of functions to the body. PEMF is a safe and non-invasive treatment that has obtained FDA approval and has been used in Europe for over 20 years. PEMF is a tissue repair therapy that has been used for muscle pain from athletes to arthrits.

Alzheimer's Disease	Joint Disease	Duchenne-Erb Disease
Glaucoma	Respiratory Problems	Osteoarthritis
Pancreatitis	Cancer	Ulcers (Gastric and Duodenal)
Amyotrophic Lateral Sclerosis	Kidney Problems	Endometriosis
Hair Loss	Sexual Disorders	Osteochondrosis
Parkinson's Disease	Heart Disease	Ulcers (Trophic)
(Lou Gehrig's Disease)	Lung Disease	Endometritis
Headache	Sleep Disorders	Osteonecrosis
Peripheral Neuritis	Chronic Venous Insufficiency	Urinary Problems
Ankle Sprain	Lupus Erythematosus	Epilepsy
Hemophilia	Spinal Cord Injury	Osteoporosis
Pneumonia	Dental Problems	Wound Healing
Arthritis	Multiple Sclerosis	Gastroduodenitis
Hepatitis	Stroke	Otitis Externa
Post-Herpetic Neuralgia	Depression	Disease of the Larynx
Blepharitis (infection of the eyelid)	Muscle Injury	Neurological Disorders
Herniated Disk	Synovitis	Tuberculosis
Pseudoarthrosis	Dermatitis	Tourette's Syndrome
Bone Fractures	Neck Pain	
Hip Problems	Tendonitis	
Psychiatric Disorders	Diabetes	
Bronchitis	Nerve Damage	

This non-invasive way to treat people is the obvious wave of the future!

PEMF and LowLevel-Laser therapies are frequently combined in research and also here in the clinic and may enhance one another.
